**Warranted Protection for  
 the Appearance of Your Vehicle!**  
**Nationwide Transferable Coverage**  
**Clean - Repair - Replace**

**Protect Your Investment!**  
**Maintain Vehicle Good Looks!**  
**Increase Resale/Trade-In Value!**  
**Available on Used and  
 Leased Vehicles!**

## Fabric Protector

- Resin-based formula encases every fiber and thread
- Will not wash off like water-based products
- Prevents stains from coffee, soft drinks, milk, juice and most spills
- Spills just bead up and wipe off
- Dirt can be vacuumed or wiped off with gentle cleaning solution
- Prolongs fabric life
- Fabric retains natural texture and appearance

LIQUIDS BEAD UP ON TREATED FABRIC

UNTREATED FABRIC ABSORBS SPILLS & STAINS

## Leather & Vinyl Protector

- Protects against permanent staining from moisture and spills
- Conditions and beautifies leather and vinyl interior surfaces
- Protects and helps maintain that soft, like-new feel
- Special acrylic coat lasts for years ... does not evaporate from surface
- Non-greasy formula won't attract dust or leave surface slippery

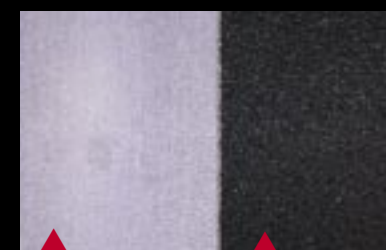

## Generation 7 Paint Sealant

- Outstanding protection against fading, chalking and oxidation
- Provides deep, long-lasting high-gloss shine
- UV blocker helps protect against oxidation and fading
- Enhances the clear coat of today's two-layer paint finishes
- Superior polymer-copolymer resin formula encourages water to "sheet off", leaving minimal water beads

## Undercoating

- Insulates and protects from corrosion caused by road salt, dirt, stone and gravel abrasion
- Provides added noise insulation; acts as a sound deadener for a quieter ride
- Leaves a finished "cosmetic" appearance to wheel wells
- Remains flexible and pliable for better adhesion to today's unibody frames
- Unmatched product performance; special additives provide superior adhesion and resilience
- Will not run or drip at high temperatures or become brittle in sub-zero weather
- Contains no tar-like ingredients that can attack body coatings

Untreated underbody is exposed to corrosive elements.

Treated surface is sealed and protected from corrosive elements.

## Anti-Rust Compound

- Protects inner panels from salt, water and other damaging elements
- Prevents inside out rust-through
- Penetrates crevices, cavities and other rust-prone areas for maximum protection
- Wax-based formula bonds permanently, forming a clear, waterproof, salt-resistant seal
- Applied through existing body holes; no hole drilling required
- Will not restrict or plug critical drain holes

Using existing body holes, fogging spray application penetrates hard-to-reach cracks and crevices, providing maximum protection from inside out rust-through.
