

CONGRATULATIONS

On your choice of ValuGard to protect your vehicle investment!

To insure maximum protection, follow these important steps:

PAINT SEALANT

Do not wash your vehicle for seven (7) days. Also, do not use laundry or dish washing detergents.

FABRIC PROTECTOR

Application is dry when the vehicle is delivered, but requires 24 hours to cure. Do not "test" by pouring any liquid on fabric. Remove any spills promptly by blotting with a damp towel.

LEATHER & VINYL PROTECTOR

The product is a coating, not a dressing. There is no need to reapply product. Remove any spills by wiping with a damp towel.

RUST INHIBITOR

Product is dry when your vehicle is delivered, but it takes several days to cure. Any odors will dissipate in 24-48 hours. Leaving the windows down (weather permitting) will help with odor dissipation.

UNDERCOAT

Product is dry when your vehicle is delivered, but takes 24 hours to cure. Do not pressure wash the vehicle's underbody for seven (7) days. Do not apply any solvents to underbody.

Thank you for selecting ValuGard!
