

PRODUCT DATA SHEET

Fabric Protector / VG-103

Automobile Manufacturer Engineering Approved

Features: Resin / solvent formula thoroughly encases and penetrates fibers to become a permanent part of the fabric. Not just a surface treatment like many other products. Won't alter the appearance or feel of the fabric.

Benefits: Long wearing protection against stains from foods, beverages, common soil and pet mishaps. Superior to water based formulas.

Uses: Fabric, upholstery and carpeting in cars, trucks, boats and motor homes.

Directions: Apply with **VG-117** pressure spray applicator. Begin on headliner applying a fine mist. Next, treat the seating areas, door and trim panels, and, finally the carpeting. If there is any product left over spray the floor mats and trunk liner. One 16 ounce bottle treats the average vehicle.

Tips: Pay particular attention to the driver's seat and the immediate surrounding area due to increased wear and likelihood of spills. Dry time is approximately 1.5 hours; maximum repellency is achieved in 24 hours.

Sizes: VG-103 = 12 pints per case
VG-103P = 5 gallon pail
