- A - Acid Neutralizer / A-100**
- B - Alkaline Neutralizer / B-102**
- C - Detail Wash / C-104**

ValuGard Paint Neutralization System

VOC compliant

Features: A three-step neutralization and wash system formulated to remove rail dust, hard water deposits and other forms of industrial fallout.

Product "A" – Acid Neutralizer removes waxes, storage stains, and any acids which may have been deposited on the paint surface.

Product "B" – Alkaline Neutralizer, removes alkaline deposits and ferrous metal fallout, (rail dust).

Product "C" – Detail Wash – is our premium car wash solution, excellent for everyday use, and also the final step in our *Neutralization Process*.

Benefits: Leaves paint surfaces uncontaminated from environmental and industrial fallout. Allows for correct damage repairs, reduces buff time on pre-owned vehicles.

Uses: All painted surfaces to return to neutral condition and to reduce overall process time.

Directions: Three simple wash steps, no rubbing. See product containers for more complete information. All three must be used in order to ensure complete decontamination.

Tips: Keep wash mitts for "A" and "C" separate to ensure full product performance.

Sizes: Product "A":

VG-A100G = 4 gallons per case

VG-A100 = 5 gallon pail

VG-A101 = 55 gallon drum

Product "B":

VG-B102G = 4 gallons per case

VG-B102 = 5 gallon pail

VG-B103 = 55 gallon drum

***Product "C":**

VG-C104 = 12 pints per case

VG-C104 = 4 gallons per case

VG-C104S = 5 gallon pail

VG-C104DS = 55 gallon drum
