

PRODUCT DATA SHEET

PROGARD - Magnesium Chloride Remover

Trailer, Chassis & Truck Wash – VG-502

Features: An alkaline cleaner liquid concentrate for cleaning vehicles of all types. The blend of detergents penetrates and disperses road and salt film and after rinsing leaves the surface charged to repel dirt and soil. Low foam for better penetration into seams where Magnesium Chloride is difficult to remove.

Benefits: Cleans Magnesium Chloride residue from all surfaces. Will help brighten aluminum surfaces without etching and also works well to remove bugs, tar, and asphalt. Designed to be applied by brush, moderate or high pressure spray, and can also be used in steam cleaning applications. Completely Biodegradable.

Uses: For removing road grime, salts and Magnesium Chloride residue from all transportation vehicles, Trucks, Trailers, Chassis, Vans, and Buses.

Directions: For general washing mix 20–1, Wash vehicle with brush or wash mitt and allow to soak for 2-3 minutes then rinse with high pressure water. Do not allow to dry on vehicle.

For cleaning tough areas like wheel wells, chassis, and very soiled wheels. Apply VG-502 at 1-1 mix to wet surface, allow to set for 3-5 minutes, Agitate as needed and then rinse with moderate to high-pressure Water spray for a clean surface.

Tips: Dry all painted and glass surfaces after rinsing to prevent water spotting.

TYPICAL PROPERTIES

Appearance:	Blue Liquid
Specific Gravity (68°f)	1.040
LBS. per Gallon:	8.65
pH:	<12.5
Foam:	Moderate/Low Stable
Surface Safety:	Safe for use on Steel, Stainless Steel, Aluminum, Chrome, Paint and Glass When used as directed.

Sizes: 5 Gallon Pails
55 Gallon drums
